

Information for all Residents

Rechargeable Repairs Policy

1st June 2018

Castles & Coasts Housing Association (CCHA) aims to provide an excellent repairs service to our residents in compliance with our legal obligations and the tenancy agreements we hold with our tenants. The income CCHA collects through rents, service charges and rechargeable repairs enable us to provide our services to residents.

The Association does not tolerate damage or neglect to our properties, as detailed in our tenancy agreements. As such, where damage or neglect has occurred and we have to carry out a repair as a result, we will charge the resident for this repair to be carried out – this is known as a rechargeable repair.

Our new Rechargeable Repairs Policy will go live on 1st June 2018. The information below is to help you understand what a rechargeable repair is, and what process we will follow for rechargeable repairs.

What is a rechargeable repair?

As a resident of CCHA, you have the responsibility under your tenancy agreement to undertake repairs which have been caused to your home by damage or neglect, or by visitors who have been invited to your home.

You will normally be recharged for repairs undertaken by the Association in the following circumstances:

- Where the repair is not the result of fair wear and tear and is not the Association's legal responsibility
- When a contractor has attended for an appointment and has been unable to gain access on more than one occasion (this will be the call out fee, if this has been charged to the Association by the contractor)
- When a contractor has attended and it is found that the repair is the responsibility of the resident

What type of things might I be charged for?

Our most common types of rechargeable repairs are:

- Accidental damage to windows, doors and internal fixtures or fittings
- Non-accidental breakages of glass where a crime reference number has not been obtained
- Breakages to sanitary ware - baths, wash basins, toilet basins and cisterns
- Floods from washing machines, basins, baths and toilet basins
- Blocked sinks or toilets
- Damage to doors and windows (where board up only would initially be actioned)
- Lost keys
- Removal of items after a resident has moved out and subsequent cleaning of the property
- Damage caused during the execution of a warrant i.e Police
- Overgrown and untidy gardens

Haven't you always charged for rechargeable repairs?

Yes, the Association have previously charged residents for the items listed above. As normal, residents will usually be advised that they may be recharged when requesting a repair OR by the contractor on site at the time of inspection.

So what has changed?

Previously you could request a non-emergency repair and the work would be completed before a charge was added to your rent account.

Under the new policy you will be required to pay in full and in advance before the repair is raised. This is to protect the Associations' income and enable us to continue to provide efficient services.

It is becoming standard practice for landlords to charge in advance for non-emergency repairs.

What if I cannot afford to pay in full?

If you cannot pay for the repair all in one go, then you can set up a repayment plan over a longer period. Once you have paid for the rechargeable repair in full the job will be raised and repair completed.

As always, you have the option to complete your own repairs that are your responsibility, as long as you use a certified/qualified contractor. We may ask to survey works once completed.

This change does not affect your normal day to day repairs, and you can continue to request those as normal where there are property defects or fair wear and tear. This change only applies to rechargeable repairs where you or a visitor has caused damage or neglect, whether accidentally or intentionally.

Former residents will continue to be recharged by the Association if expenses are incurred for repairing, clearing or cleaning a property when it has been vacated, including if expense is incurred in redecoration due to the poor decorative order in which the property has been left.

Residents will have access to an appeals/ complaints process for any rechargeable repair.

Home Contents Insurance

It is advisable that residents have their own contents insurance to cover any damage caused by them that the Association would deem as rechargeable.

If you do not have home contents insurance, our Customer Services Team can provide you with information about a scheme which is provided for social housing residents. However we advise that you research a number of different products and services, to find the right one for you.
